PROJECTS

Online Ferry Ticketing System (Laravel)

The Online Ferry Ticketing System is designed to facilitate ticket sales for ferry services, offering single-trip tickets, round-trip tickets, and monthly passes. It operates with a central headquarters (HQ) and two port locations, with data synchronized between the ports and the HQ.

Financial Management System (Laravel)

The Financial Management System is a comprehensive platform designed to facilitate seamless fund transactions and management for both individual users and businesses. Its key modules include funding, top-up, withdrawal, termination, nomination, and refund functionalities.

Online Web QR Ordering System (Laravel)

The Online Web QR Ordering System is an innovative solution designed to streamline the ordering process through the convenience of QR codes. This system allows users to place orders easily by scanning QR codes displayed on a website or mobile app, eliminating the need for manual input of information.

Popup Banner Manager (PHP)

The Popup Banner Manager is a sophisticated web-based application developed using PHP (MVC Architecture), jQuery, MySQL, HTML, and Bootstrap. It is designed to display customizable pop-up banners on websites, controlled by a specific domain name through an attached code snippet.

International Shipping Fee Calculator (PHP)

The Shipping Fee Calculator is a web-based application developed using PHP, jQuery, HTML, and Bootstrap. It supports bilingual functionality and allows users to calculate shipping fees for both Air Freight and Sea Freight based on weight or volume (m^3).

CargoConnect (PHP)

Cargo Connect is a web-based application designed for efficient cargo management and tracking, developed using PHP with an MVC architecture, jQuery, MySQL, HTML, and Bootstrap.
